CRIPTONITE ASSET MANAGEMENT

OBJECTIVES

Targeting an average of 6% per month

Limiting exposure to underlying volatility by strict asset allocation

Divide portfolio between short and mid term swing trade investments

METHODOLOGY

The swing trades strategy is based on a proprietary method combining revised Elliott Wave's Theory and identification of cycles in different time frames.

Execution will ensure to enter the market at the best possible price within identified trend against an invalidation level.

Strict risk management aims to exit gradually profitable trades, locking up gains as well as cutting exposure when markets turn negative
